Classroom Assessment Guide

Supporting feedback and evidence of learning

1. Purpose of assessment

• Assessment helps teachers identify what learners understand, monitor progress and plan next steps.

• Assessment should align with the lesson outcomes and be fair to all learners.

2. Formative assessment

• Use questioning, observation, short quizzes, exit tickets, peer review and class exercises during learning.

• Give specific feedback that tells learners what they did well and how to improve.

3. Summative assessment

• Use end-of-topic tests, projects, practical tasks or examinations to judge achievement after a period of learning.

• Explain the criteria and marks before learners begin where appropriate.

4. Constructive feedback

• Be timely, respectful and specific.

• Focus on the work and the next improvement step rather than labelling the learner.

• Allow learners to correct errors and reflect on progress.

5. Using results

• Identify common misconceptions and reteach difficult concepts.

• Provide extension activities for learners who have mastered the topic.

• Keep assessment records securely and share them only with authorised people.

Adapt assessment practices to the approved curriculum, school policy and learner needs.
